Attached are the results from analysis of samples from the Southern California Oil Platforms performed at the EPA Region 9 Laboratory.

Due to a communication lapse here at our laboratory the bottles intended for oil and grease analysis (which is not performed at this lab) were not sent to Curtis and Thompkins laboratory in Berkeley until their holding time had expired. C&T will still perform the oil and grease analysis and I will forward the results when they become available. I apologize for this error on our part.
